From: Arkeitha Monroe May, MOB
Early Intervention Central Billing Office
Senior Director of Claims and Billing

Re: QClaims Web-based Version

The Early Intervention Central Billing Office (EI-CBO) is pleased to announce that the QClaims application is now web-based.

What does this mean:

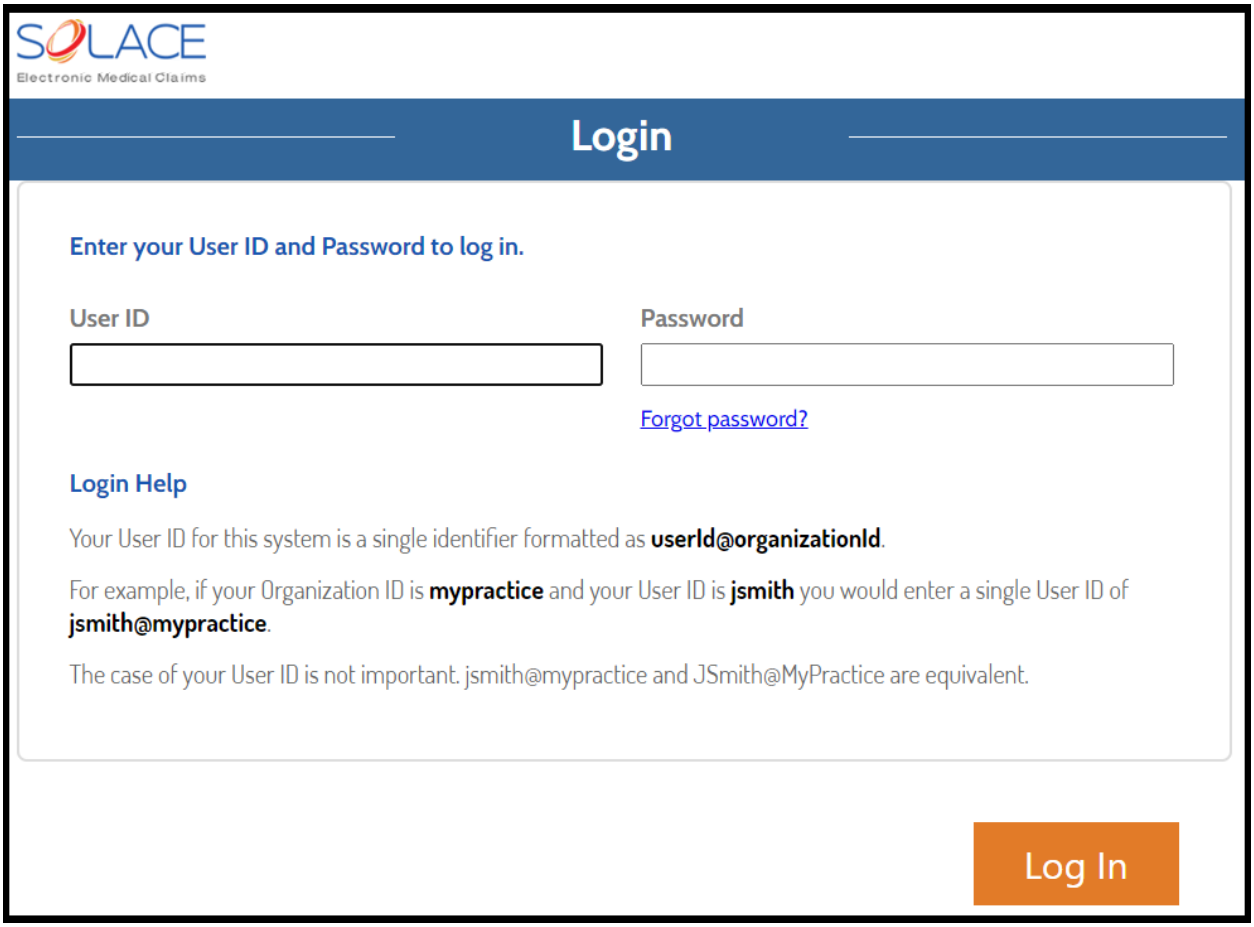
- QClaims accounts may be accessed from any computer or device with an internet connection by using a browser such as Google Chrome, Firefox, or Safari. Internet Explorer is not recommended.
- Java is not required to access the web-based version.
- Secure billing.

Account information does not need to be re-created or duplicated. Provider, patient, claim, and payment information has been migrated to the web-based version for current QClaims Users.

To Access the Web-based Version Current QClaims Users Should:

1. Navigate to the QClaims website: http://spiclaims01.eicbo.info/
2. Click the Log In link located at the top of the web page. The Login page will appear.
3. Enter the same User ID used to log into the application. For example, UserID@OrgID
4. Enter the same password used to log into the application.
5. Click the **[Log In]** button.

**Image of QClaims Log In Page is located on the next page.*



A Setup/User Guide is available for both new and current QClaims Users on the QClaims page of the EI-CBO website (www.eicbo.info). How-to videos will be available soon.

Please contact the EI-CBO Help Desk at 1-800-634-8540 with questions.
